## Introduction

The Common Grant Application is a cloud-based grant management system and provides a simple, flexible and inexpensive way for grantmakers to manage their entire application and grant life cycle. The Common Grant Application is customizable and provides complete capabilities to receive, track, review, evaluate and manage online and paper-based LOIs, applications, grant agreements, grants and grant reports. It will make you and your grantseekers lives simpler and easier.

## Features

### General Features

- Grant management solution for grantmakers, common application for grantseekers.
- No hardware or software to install, support or maintain.
- The service is reliable and always available. Information is backed up on a daily basis.
- Each account may have multiple users. Each user can have different access privileges.
- Users have secure password protected access.
- Organization and program information is persistent and reusable.
- Grantseekers and grantmakers can control the privacy and sharing of their information.
- Research can be performed on the grantseekers and grantmakers.

### Grantmaker Features

- One step (application) or two step (LOI and application) process.
- Flexible and customizable LOI and application questions.
- Create and maintain independent programs that use the same or different filtering criteria.
- Manage LOIs, applications, grant agreements, grants and grant reports.
- Filter applications that are submitted.
- Receive and review Web or paper-based LOIs or applications. Review uploaded grantseeker documents or media files.
- Assign applications to be scored, rated or ranked to individual evaluators or groups of evaluators.
- Evaluate, approve and reject LOIs and applications.
- Create an unlimited number of custom reports that can be printed or exported to CSV format to be used in Excel or other programs.
- Track, manage and display real-time status of online applications either individually or in aggregate.
- Upload and manage documents and media files.
- Create and join collaborative grantmaking groups.
- Geopositioning and word clouds.

## What Makes Us Different

- In the cloud.
- No setup, training, maintenance, support or per user fees.
- Unlimited and free grantseeker and grantmaker support.
- Many grantseeker to many grantmaker model.
- Reusable and scalable.
- No forms or complex workflows to create.
- Collaborative and real-time.
- Grantseekers can easily re-use their information for other applications.
- Grantseekers can't apply unless their application meets your criteria.
- Grantseekers can easily track the status of their applications.

## Value

The Common Grant Application can save time, money, effort and improve the overall quality and experience of the grant seeking and grant making process. Programs and activities will become more visible and easier for others to find, follow and review.

## Pricing

The Common Grant Application service is completely free to grantseekers. Grantmakers pay a low monthly asset-based subscription fee and a low per application fee.
